PROJECTS

G-Associates
Description: It is a website describing the services offered by the G-Associates' company.
Link: G-Associates

Bjoy_decors
Description:It is a website for marketing and selling bottle decors.
Link: bjoy decors

- Google cloud platform
- Data analysis

Fuel Economy Data analysis: I have worked on datasets provided by the Environmental Protection Agency. The tasks included cleaning column labels, filtering and dropping nulls, inspecting and fixing data types, making conclusion of the data using visuals as well as merging datasets. All these became possible with the help of pandas, numpy, matplotlib and seaborn. Link: Fuel economy data analysis
